

Connect Your Universe

The complete school network solution for emergencies, events and every day.

Telecenter[®] U by *Rauland*
Connect Your Universe[™]

One Network Solution

Many communication technologies united by a single link—that's the advantage Rauland-Borg's Telecenter U brings to your educational environment.

Everywhere Connections

Telecenter U is a Web-based system that connects and drives the equipment you already have in place throughout the school, around the campus and across the district. The system links all of your separate communication technologies—intercom/paging, PA/sound and emergency—in all of your locations to deliver a seamless, unified solution. It's designed to handle the three E's that matter in your environment: emergencies, event management and everyday communications.

Telecenter U leverages your investment in your existing IT structure by working with systems you have in place today, whether or not they're made by Rauland-Borg. All communication functions are easily accessible from any device with a Web browser.

Telecenter U consists of two components:

- *Software installed in a single location within a school district or large campus, and*
- *"Page modules" that interface with intercom/paging systems or PA/sound systems located in your various buildings.*

No one else knows the educational environment as well as we do or can deliver a complete solution for your school or district. Telecenter U by Rauland-Borg is the smartest way to connect your entire educational universe.

In a crisis situation, confidence counts. With Telecenter U, your personnel don't have to think twice about how to activate an emergency sequence.

Emergencies SMART RESPONSE

Whether you're facing a lock out, lock down, evacuation, weather emergency or any other situation that demands a rapid response, Telecenter U enables you to take action quickly and confidently.

Safety First

Telecenter U enhances your school or district's unique crisis plan by connecting all of your facilities and guaranteeing synchronized communication. You can create a sequence of events—including pre-recorded voice announcements, tones and other critical notifications—for a wide range of emergencies. A sequence can be activated from any location via a Web browser or telephone for the entire system, a designated group of facilities or a single school.

How well your school responds during an emergency hinges in part on your crisis management strategy. Telecenter U helps you take a proactive approach by letting you pre-record messages that provide instructions for different crisis scenarios. For example, you might pre-record directives for staff and students on how to respond in an emergency evacuation when there is an immediate threat to the school.

Telecenter U also allows you to make on-the-fly announcements as the situation changes, conduct live paging within a school or across the district, and send an all-clear message when the crisis is over.

When the pressure is on and every moment counts, you'll have confidence in Telecenter U. Unlike stand-alone systems that are used only in emergencies, Telecenter U is familiar. There's no need for personnel to remember how to use the network because they already use it every day. And since the system can be activated with a single call, there are no wasted steps.

Parents need to trust that their children are in good hands, especially in an emergency.

Routine event management has never been easier. Telecenter U lets you create and modify schedules effortlessly via the Web.

Event Management SMART SCHEDULES

Students, teachers, staff and parents depend on schedules for a smooth school day, and Telecenter U makes managing those schedules virtually effortless.

Effortless Scheduling

When a school or district is off schedule, late dismissals and time fluctuations disrupt instructional time and after-school activities. When your communications systems are linked via Telecenter U, schedules in every facility run accurately and efficiently.

With this smart solution, bell schedules can be pre-planned, sending tones, voice and music to the desired locations from anywhere on your campus. Thanks to Telecenter U you can program your calendar for a whole year.

Every day or once a year, staff can easily manage any event your calendar demands such as:

- Classroom change tones
- Dismissal bells
- Pre-recorded messages
- Playing of music in hallways before and after school and during passing periods
- National anthem and Pledge of Allegiance
- Bus dismissals
- Adapted schedules (half-day, for example).

You can designate anyone to manage your routine events schedule—either at the school level, campus-wide or across the district—from anywhere on your network. Authorized personnel simply access the Telecenter U network via easy-to-navigate Web pages and use the intuitive calendar interface to assign a particular schedule to a specific day or as a recurring event.

The easier it is to manage the daily schedule, the better for everyone — students, teachers and staff.

Telecenter U handles all of your daily live communication needs, whether within a single location, across multiple facilities or throughout your entire district.

Everyday Communication SMART DAYS

With Telecenter U, live communication is simple and targeted; it's a solution that can be used all day, every day.

Versatility In Action

Just login on any PC with a Web browser within your school, and you're ready to communicate to a single location, a group of facilities or your entire district. The system handles all of your everyday needs by connecting to disparate systems that communicate messages regarding daily operations, including:

- Morning announcements
- After-school announcements
- Paging
- Lunch
- Celebrations
- Extracurricular activities
- Athletic team announcements
- And more.

Telecenter U is ready for anything. Whether you want to play a junior high school's fight song after a big victory, issue a reminder message to all high schools about upcoming standardized testing, or have the superintendent address every school in the district, you can manage all live communication from the system's easy-to-use Web pages.

With Telecenter U, you can rely on a single system—unified and simple.

Designated personnel simply login to the system via a Web browser to access any communication function.

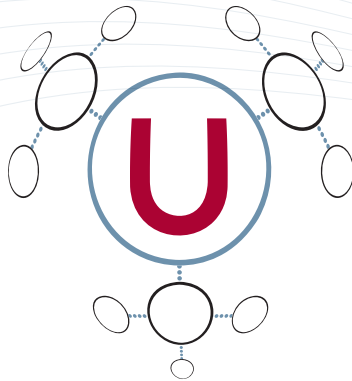

Your Entire Universe SMART SOLUTION

When you connect your universe with Telecenter U, your educational environment benefits from the most advanced communication system available.

The Leader In School Communication

Telecenter U is just one product out of Rauland's complete line-up for educational facilities. Whether you need products or accessories for your classroom, school, campus or district, we have you covered:
